Declaration

I declare that this is my own work and this dissertation does not incorporate without acknowledgement any material previously submitted for a Degree or Diploma in any other University or institute of higher learning and to the best of my knowledge and belief it does not contain any material previously published or written by another person except where the acknowledgement is made in the text.

Also, I hereby grant to Sri Lanka Institute of Information Technology, the nonexclusive right to reproduce and distribute the dissertation, in whole or in part in print, electronic or other medium. I retain the right to use this content in whole or part in future works (such as articles or books).

Name: H. A. M. Prasadinie

Registration No.: MS20907884

The above candidate has carried out research for the master's degree Dissertation under my supervision.

Supervisor: Mr. Dilshan De Silva

Signature of the supervisor: Date: 06-11-2021

Abstract

The 2020 Covid – 19 global epidemics had a significant impact to the entertainment industry. That's greatly affected societies around the world. And also due to government policies citizens are unable to participate for public gatherings, public businesses and public areas. In music industry, major part of income of musicians depends on tours, musical show. But in this pandemic situation, had a huge negative effect to the musicians' income because they cannot perform face-to-face and cannot arrange huge gatherings.

However, nowadays musicians have to turn to digital media and pushed music industry to the new reality of online concerts-virtual concerts. So, musicians are taking the show/concert online. Musicians should send links for the virtual concerts individually. Apart from that, the research proposes to implement an application to put all the details of the concerts. And through the application people can pay and get the link easily. If needed people can participate to the concert through the application and requesting songs from the band by commenting and can see the views for the performance. Advertisers can show their advertisements while performance going on.

Acknowledgement

The work described in this research thesis was carried out as my final year research project for the module Research Project. The completed final project is the result of combining all the hard work of me and the encouragement, support and guidance given by many others. Therefore, it is my duty to express my gratitude to all who gave me the support to complete this major task.

I am deeply indebted to my supervisor Mr. Dilshan De Silva, Senior Lecturer of Sri Lanka Institute of Information Technology whose suggestions, constant encouragement and support in the development of this research, particularly for the many stimulating and instructive discussions.

I am also wish to thank all my colleagues and friends for all their help, support, interest and valuable advices. Finally, I would like to thank all others whose names are not listed particularly but have given their support in many ways and encouraged me to make this a success.
